

Sam Wilkinson

UX/UI Desinger

Exeter, UK

- 8+ years of experience working as multidisciplinary designer.
- Identifying and solving problems based on the needs of users.
- Meticulous, with a keen eye for detail and a desire for perfection.

About Me:

A designer with over eight years of experience who is passionate about creativity and innovation, with a focus on designing the digital experience. A natural problem solver and prolific researcher who develops appealing customer journeys to increase conversions and revenue by providing relevant and engaging experiences to customers.

I adore the craft, the teamwork, and the dedication necessary to produce something sensational. Collaborating with colleagues and clients to truly understand and accomplish the desired goals. I believe that understanding what is technologically possible is essential for creating the most ambitious work.

I have extensive knowledge in a variety of disciplines, including:

- Branding
- Identity
- Digital
- UX
- UI
- Type
- Typography
- Web
- Development
- eCommerce
- Print

Conceptual:

Design Process — Proficient in user experience design, brand development, research, visual design, information architecture, wireframing, prototyping and technologies.

Creative Practice — Naturally gifted in user interface design, with in-depth knowledge of layout, grid systems, UI best practices, accessibility, design systems, and responsive design.

Visual Experience — Can build functional prototypes of digital experiences with beautiful graphics, smooth interactions, transitions, and animations.

Communication — Comfortable presenting concepts, designs and processes as well as confidently articulate the value of design in order to gain client and stakeholder buy-in.

User-centred — Strategic, solutions-focused and a user-first problem-solving mindset. With the ability to simplify complex ideas and make them simple to use for customers.

Commercial Awareness — Understanding what is technically feasible to develop viable designs that correspond to how people think and behave which convert to customer value.

Collaboration — Enjoy working collaboratively as part of a team, utilising creativity and different points of view to find effective solutions to digital challenges.

Technical — Extensive knowledge of cross-browser, site speed, SEO, and usability design, as well as the ability to build scalable systems with reusable components.

Innovative — Dedicated to producing impeccable visuals with a sense of delight, who thrives when given creative freedom to explore and research an idea or concept.
